

Farooq Shaik

Full Stack Developer | Ruby on Rails | React.js | PostgreSQL | MongoDB | LLM Integration

📍 Bangalore | ✉️ shaikfarooq2020@gmail.com | 📞 +91-9290662243 | 🌐 /faru506 | 📺 /faru506

Professional Summary

Full Stack Developer with **3.5+ years of experience** building scalable web applications using **Ruby on Rails**, **React.js**, **PostgreSQL**, and **MongoDB**. Experienced in designing **RESTful APIs**, optimizing backend performance, implementing **Sidekiq background jobs**, and integrating **LLM APIs** into real-world workflows. Proven ability to troubleshoot production issues, improve system reliability, and deliver production-ready solutions.

Skills

Languages: Ruby, JavaScript (ES6+), SQL

Frontend: React.js, HTML5, CSS3, Bootstrap, TailwindCSS

Backend & APIs: Ruby on Rails, REST APIs, Sidekiq, Authentication

Databases & Tools: PostgreSQL, MongoDB, MySQL, Docker, Git, DataDog

AI & Concepts: OpenAI (ChatGPT), Claude, Gemini, Grok, OOP, System Design Basics

Work Experience

Software Engineer – Mirafra Technologies

Sept'25 – Present

- Diagnosed and resolved **production 500 errors**, improving application reliability.
- Implemented **Sidekiq background jobs** for bulk CSV processing, reducing request processing time by **80%**.
- Optimized **ActiveRecord queries** and implemented **database indexing**, improving API response performance.
- Integrated **DataDog monitoring and logging**, improving system observability and faster issue resolution.

Software Engineer – VIT Infotech

Jul'22 – Aug'25

- Designed and deployed **15+ RESTful APIs using RoR**, supporting authentication and workflow automation.
- Integrated **LLM APIs (ChatGPT, Claude, Gemini, Grok)** into CMS workflows, enabling AI-assisted content generation and intelligent suggestions.
- Optimized **database queries and indexing**, improving API response time for **10k+ monthly users**.
- Developed reusable **React.js components**, improving frontend consistency and development speed.
- Collaborated across frontend and backend modules to deliver full stack features.

Software Engineer Intern – VIT Infotech

Mar'22 – Jun'22

- Developed authentication and UI modules using **React.js**, improving application usability.
- Assisted in backend development using **RoR**, supporting **API integrations** and feature implementation.
- Participated in **debugging** and testing of frontend and backend features, improving application reliability.

Projects

Content Management System (CMS) - Ruby on Rails, MongoDB, JavaScript, React

- Designed and developed a **role-based CMS** supporting 20+ editorial users.
- Built scalable **RESTful APIs using Ruby on Rails** with caching and indexing to improve publishing performance.
- Integrated **LLM APIs** to automate content generation and intelligent editorial workflows.

Health Management System - Ruby on Rails, PostgreSQL

- Developed scalable **backend APIs using Ruby on Rails** for patient and appointment management workflows.
- Optimized database queries and implemented logging mechanisms to improve reliability and debugging.
- Resolved production-level issues, improving overall system stability and performance.

Crowdfunding Platform - React.js, JavaScript

- Developed a responsive **React.js dashboard** enabling users to manage campaigns and view funding analytics.
- Built reusable UI components and optimized rendering performance to improve frontend responsiveness.

Education

Bachelor of Technology in Computer Science at SRIT.

Aug 2018 – Jun 2022
