

Farooq Shaik

Full Stack Developer | Ruby on Rails | React.js | API Design | Performance Optimization | LLM Integration

📍 Bangalore | ✉️ shaikfarooq2020@gmail.com | 📞 +91-9290662243 | 🌐 /faru506 | 📺 /faru506

Professional Summary

Full Stack Developer with **3.5+ years of experience** building scalable, high-performance web applications using **Ruby on Rails** and **React.js**. Expertise in designing **RESTful APIs**, developing responsive user interfaces, optimizing application performance, and integrating **LLM-based features**. Strong experience in debugging production issues, improving system reliability, and delivering end-to-end features in Agile environments.

Skills

Languages: Ruby, JavaScript (ES6+), SQL

Frontend: React.js, HTML5, CSS3, Bootstrap, TailwindCSS

Backend & APIs: Ruby on Rails, RESTful APIs, Sidekiq, Authentication, API Design, Microservices

Databases: PostgreSQL, MongoDB, MySQL

Tools, Testing & Concepts: Git, Docker, DataDog, CI/CD, RSpec, Unit Testing, Debugging, Performance Optimization, API Latency Optimization, System Design Basics, OOP, Agile, Scrum

Work Experience

Software Engineer – Mirafra Technologies

Sept'25 – Present

- Diagnosed and resolved **production issues** across frontend and backend, reducing system downtime by **30%**
- Developed and enhanced **React.js interfaces**, improving user experience and responsiveness
- Implemented **Sidekiq background jobs** for bulk data processing, reducing request time by **80%**
- Optimized **ActiveRecord queries and indexing**, reducing API response time by **40%**
- Integrated **DataDog monitoring** and collaborated across teams to deliver **end-to-end full stack features**, reducing issue detection time by **50%**

Software Engineer – VIT Infotech

Jul'22 – Aug'25

- Designed and developed **15+ RESTful APIs** using Ruby on Rails for scalable backend services
- Built reusable and responsive **React.js components**, improving UI consistency and development speed
- Integrated **LLM APIs** to enable AI-driven content generation, reducing manual effort by **40%**
- Optimized **database queries and indexing**, improving performance by **35%** for **10k+ monthly users**
- Collaborated with cross-functional teams, reducing production bugs by **20%** through code reviews

Software Engineer Intern – VIT Infotech

Mar'22 – Jun'22

- Developed UI modules using **React.js** and assisted in backend development for API integrations
- Participated in debugging, testing, and feature implementation across frontend and backend

Projects

Content Management System (CMS) - Ruby on Rails, MongoDB, JavaScript, React

- Developed a **role-based CMS** supporting **20+ active users**, improving content publishing efficiency by **30%**
- Built scalable **REST APIs** with caching and indexing to improve performance
- Implemented **React-based UI**, improving workflow efficiency and reducing manual operations by **25%**
- Integrated **LLM APIs** for AI-assisted content creation, reducing content generation time by **40%**

Health Management System - Ruby on Rails, PostgreSQL

- Developed backend APIs and optimized queries with logging to improve performance and reliability

Crowdfunding Platform - React.js, JavaScript

- Built a responsive **React dashboard** for campaign management and analytics
- Developed reusable UI components and optimized rendering performance

Education

Bachelor of Technology in Computer Science at SRIT.

Aug 2018 – Jun 2022
